

GTC Global SDN BHD

Announcement

17 March 2009

On 10 March 2009, GTC Global Sdn Bhd (formerly known as Gapurna Technologies Sdn Bhd) was awarded Network Service Provider (NSP) and Network Facilities Provider (NFP) Individual Licenses by the Malaysian Communications and Multimedia Commission (MCMC). The award was given out by Encik Megat Ishak, Director of Licensing Department and accepted by Encik Imran Salim, Executive Director of GTC Global in a Handover Ceremony in MCMC.

The Licenses will facilitate GTC Global's expansion of its CCTV infrastructure and network throughout Malaysia. It will also facilitate GTC Global's business diversification into broadband services for surveillance communication and for wireless broadband townships.

GTC Global Sdn Bhd ("GTC Global"), company number 559823-P, formerly known as Gapurna Technologies Sdn Bhd, was incorporated on 25 September 2001 and changed to its present name on 8 January 2009. The core business activities of GTC Global are to supply, install, test, commission and maintain integrated security surveillance systems and broadband solutions.

The solutions provided by GTC Global combine up-to-date video imaging expertise and other hardware systems to enable tailored CCTV and other forms of security surveillance. GTC Global's clients currently consist of hypermarkets and supermarkets within Malaysia as well as town councils and state governments in line with the safe city concept announced by the National Council Conference for Local Government in 2004. GTC Global is already an MCMC Application Service Provider Class License and Apparatus Assignment holder. GTC Global is an MSC Status company and a Malaysian Communications and also an ISO 9001:2000 certified company.
